

# WOOD FLOORS & YOUR HOME

ONE OF THE BEST WAYS TO KEEP YOUR  
HARDWOOD FLOORS LOOKING GREAT  
FOR YEARS IS TO KEEP YOUR HOME IN  
THE RIGHT ENVIRONMENT.

1

INVEST IN A  
WHOLE-HOME  
HUMIDIFIER

The best way to prevent gaps, squeaks, cupping, movement, and other issues to have a humidifier running before, during, and after installation.

2

SET TEMPERATURE  
TO 60 - 80 DEGREES

Staying at a consistent temperature will also prevent the floor from moving. Movement can cause gaps and squeaks.

3

KEEP YOUR RH  
LEVELS BETWEEN  
35-55%

It's a good idea to get an inexpensive hygrometer to keep track of the temperature and relative humidity levels in your home.

4

AND TURN ON  
THE DEHUMIDIFIER  
IN THE SUMMER

Too much humidity is bad too! Be sure to turn your humidifier to the summer setting and turn on a dehumidifier if necessary to keep the RH levels between 35-55%.
